

TONYA EHLERS'S RESULTS

## HUMAN ORIGINS : OUR SHARED HISTORY TO YOUR STORY

The questions of who we are and where we come from have been asked for throughout our history. Once we explained our origins with mythology and folklore but now we utilize modern science to answer them. Genetics help us tell the story of our origins from the beginning, through the formation of the human gene pools and to the last 2000 years of history. The test results you have just received, along with the following information, will help you understand your personal story, from the shared history of all humans to your unique family story.

## GENE POOL PERCENTAGES

### TOP 3 GENE POOLS

#1 Fennoscandia 22.2%

#2 Southern France 16.3%

#3 Orkney Islands 13.1%

### GENE POOL REGIONS

# GENE POOL %'s

## Complete Results

---

### #1 Fennoscandia 22.2%

Origin: Peaks in the Iceland and Norway and declines in Finland, England, and France

### #2 Southern France 16.3%

Origin: Peaks in south France and declines in north France, England, Orkney islands, and Scandinavia

### #3 Orkney Islands 13.1%

Origin: Peaks in the Orkney islands and declines in England, France, Germany, Belarus, and Poland

### #4 Western Siberia 12.3%

Origin: Peaks in Krasnoyarsk Krai and declines towards east Russia

### #5 Sardinia 8.8%

Origin: Peaks in Sardinia and declines in Italy, Greece, Albania, and The Balkans

### #6 Tuva 8.2%

Origin: Peaks in south Siberia (Russian: Tuvan) and declines in North Mongolia

### #7 Southeastern India 8%

Origin: Endemic to south eastern india with residues in Pakistan

### #8 Basque Country 7.9%

Origin: Peaks in France and Spain Basque regions and declines in Spain, France, and Germany

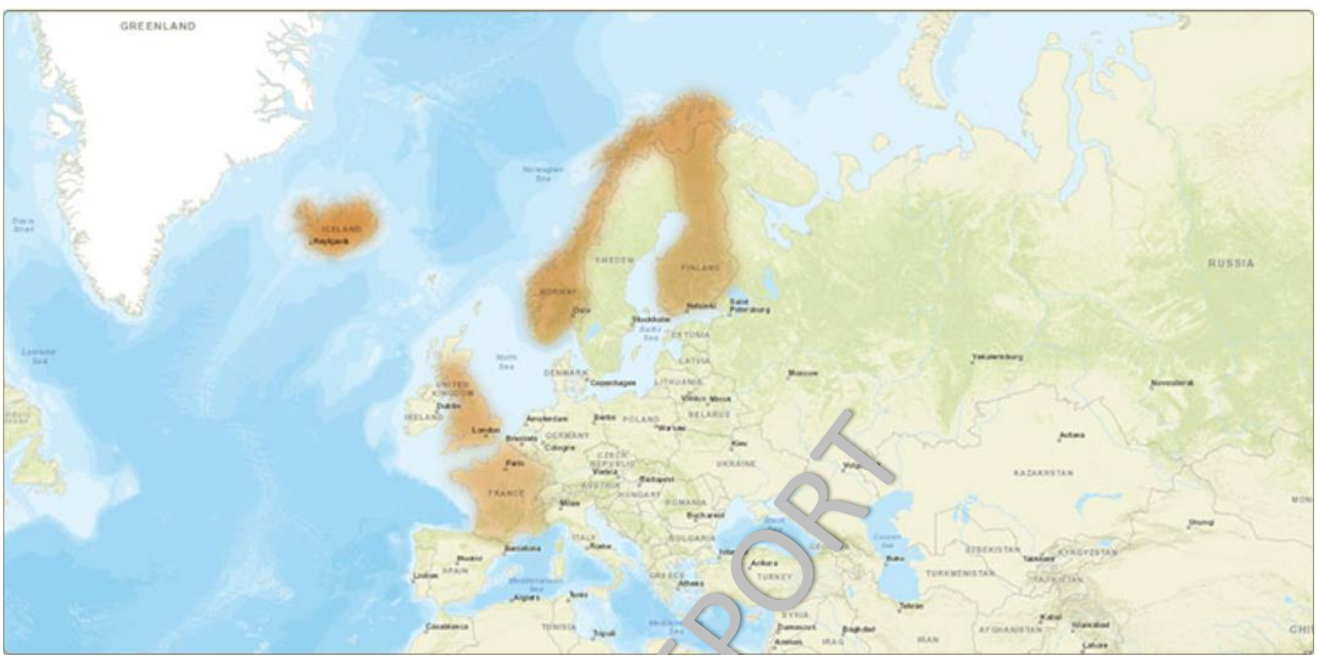

### #9 Northern India 2.1%

Origin: Peaks in North India (Dharkars, Kanjars) and declines in Pakistan

### #10 Central America 0.9%

Origin: Peaks in Mexico and Central America with residues in Peru

# DNA MIGRATION ROUTES

\* The GPS Origins test is an Autosomal (SNP) test that is not gender specific. Although both Migration Patterns represent your Maternal and Paternal DNA routes, we cannot differentiate which route is specifically your parents' individual route at this time.

## Migration Story B

### Movement from Denmark to Norway

At some point before 459 AD your ancestors moved to Norway. These are the events your ancestors would have lived through in Norway.

#### *The Nordic Iron Age*

Between 500 BC and 800 AD, Norway was ruled by local leaders in a period known as the Nordic Iron Age. During this period Norway was relatively stable; it operated under an extended family-based clan system with chieftains ruling over groups of tribes. Agricultural productivity increased and the Norwegian tribes would trade furs and skins with Romans. A writing system was developed, known as runes. People migrated from Germany, Sweden, and Denmark and Central Europe to Norway due

to Germanic tribes migrating through Scandinavia and looking for new lands to colonize during the Migration period. At the same time, populations moved from Norway to places like Central Europe with the migration of Gothic Tribes, Lombards, Heruli and Varangians to Russia and the rest of Europe, especially during the Great Migration.
